

SWIVEL FILL ADAPTER

MODEL B-70B (BRASS)

Carb Approved and Third Party Tested

The B-70 features a top section that swivels/rotates with loading nozzle movement and/or hydraulic shock, while the bottom section remains securely sealed to the 4-inch tank riser.

Simply retrofit existing fill adapter without adjustment to riser and/or spill bucket. This space saver is short enough to be easily installed in all fill sites. When used together with a flat cap, it is only a 1/4-inch higher over a standard adapter and cap.

Quality, durable stainless steel ball bearing design, allowing excellent electrical conductivity and eliminating static discharges.

CARB approved, swivel adapter reduces fugitive emissions. No direct product or vapor release.

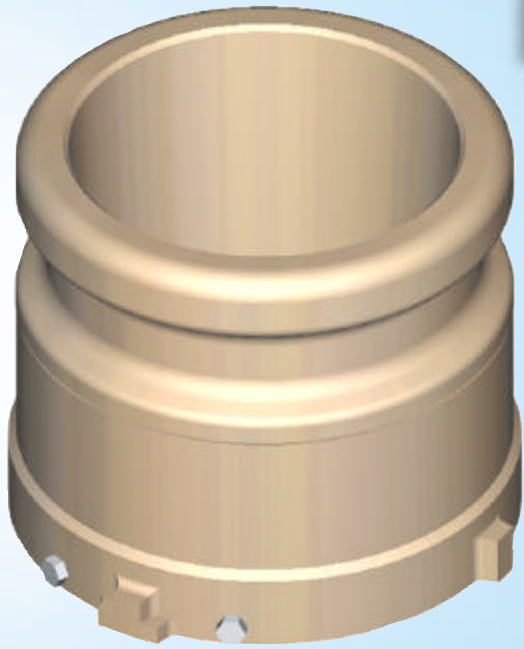

Integrated venturi design for improved product flow through adapter and drop tube.

Compatible with all current fuels and fuel additives. Utilizes teflon/viton seal that will not dry out. (E85 & M85)

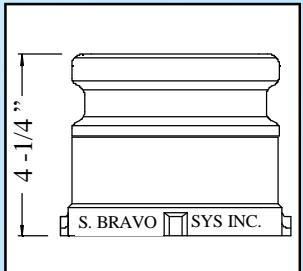

Hex head screws ease installation and/or removal.

Optional

- Identification ring reflects the adapter's swivel feature. It can be color coded to identify type of fuel. One-way grips prevent possible misplacement and/or easy removal.
- Tank capacity tag and rivets are available.
- To assure proper adapter installation and placement of the identification ring, the BT-70 tool is strongly recommended.
- *B-75B & B-75-A Swivel Vapor Adapter is also available.*

CARB APPROVED
